

Arthright Complex HS

A New Approach To Joint Health Utilising a Unique Combination of Nutrients With A Proven Track-Record

After extensive background research and countless hours of compiling published research in professional journals and phytotherapy texts, our biochemist has designed a formula that we believe will revolutionize the treatment of deteriorating joints and cartilage. Many health care professionals have related to us their use of individual nutrients, both alone and in combination, in treatment of joint and cartilage damage. Our goal was to design, in a single tablet, all of the most useful and effective supplements that nature, research and healing experience could provide. The result is a product we call Arthright Complex HS and we believe that you will be very impressed with it.

Look closely at these ingredients and our rationale then give Arthright Complex HS a try.

Chicken Cartilage II (patented Cell Renew®), also known as collagen type II, specialized extract high in glucosamine and chondroitin sulfate, hyaluronic acid and collagen, a protein that is an integral part of cartilaginous tissue. Several studies have confirmed its effectiveness in arthritic conditions.

CMO, also known as Cetyl Myristoleate (actually cerasomal-cis-9-cetylmyristoleate), is a medium chain fatty acid which has been shown in studies to be a potent weapon in the fight against both rheumatoid and osteo arthritis (as well as rheumatoid arthritis' close relation Lupus Erythematosis).

Glucosamine Sulfate and **Chondroitin Sulfate** long known to aid in the rebuilding of cartilage by provision of components of its structure.

MSM (MethylSulfonylMethane), an oxidation product of DMSO and a tree pulp extract, is a potent anti-inflammatory, has pain-relieving properties and provides important building blocks for collagen.

Manganese is essential for the formation of new cartilage and synovial fluid as well as bone formation.

Standardized Extracts of **Turmeric**, an herb with potent anti-inflammatory and anti-oxidant properties and **Boswellia serrata** that has its own unique anti-inflammatory and anti-arthritic properties that are enhanced in combination with other nutrients, according to studies.

Currently, Arthright Complex HS is packaged in 60 tablet and 180 tablet bottles.

Supplement Facts		Also Contains:
Serving size: 2 tablets Servings per container: 50		Microcrystalline cellulose, stearic acid, croscarmellose sodium, magnesium stearate
Amount per 2 tablets	%DV	Recommendation:
Manganese (sulfate)	5.8 mg 252	One or two tablets 3 times daily or as otherwise directed
Chicken Cartilage II	240 mg *	These statements have not been evaluated by the FDA. This product not intended to diagnose, treat, cure, or prevent any disease
Cetyl Myristoleate (CMO)	60 mg *	
Glucosamine Sulfate (bovine)	900 mg *	
Chondroitin Sulfate (bovine)	400 mg *	
Turmeric (95% curcuminoids)	100 mg *	
Boswellia serrata (65% boswellic acids)	150 mg *	
* DV has not been established Percent Daily Values (%DV) are based on a 2000 Calorie per day diet		

Arthright Complex HS is designed to provide maximum support for joint maintenance and health

Suggested Use Directions:

Use one or two tablets two or three times daily as a general guideline. More or less may be necessary to see the full effect. It is possible that some time may be required to notice maximum results depending on the patient. Some people do not exhibit the full effects from the use of CMO for up to 8 weeks (this is rare). Other beneficial effects should be seen in a few days.

Some of Rocky Fork Formulas synergists for this formula are:

Adrenal Complex HS, Calcium Complex, Cal Mag Aspartate, Cartilage Complex, Co-Enzyme Q10 (softgels or sublingual tablets), Magnesium Complex, Univase™ or Univase Forte™, MSM, Niacinamide, Vitamin B15.
