

Gluco-Poise

Maximum Nutritional Support to Maintain Blood Glucose Levels

This is one of those products that just keeps improving over time. As new discoveries have come to our attention we have made improvements to this already highly effective support to blood glucose maintenance. With Gluco-Poise our goal was to design, in a single capsule, all of the most useful and effective supplements that nature, the latest research and healing experience could provide. The result is a product we call Gluco-Poise and we believe that you will be very impressed with it.

Look closely at these ingredients and our design rationale then give Gluco-Poise a try.

Chromium- Chromium is an essential mineral in facilitating the uptake and proper use of insulin. We use a special blend of GTF Chromium and Chromium polynicotinate for the highest effectiveness.

L-Aspartic Acid- Important in maintaining glucose levels because it is a glucogenic amino acid, i.e, one that can be converted directly to glucose.

Vanadyl Sulfate- Vanadium is a mineral whose role in causing insulin to be taken up by cells more efficiently is well documented. Useful in supporting the body to reduce insulin resistance

Gymne sylvestre- An herb that supports the body in both metabolizing glucose and reducing the craving for sweet foods.

Bitter Melon- Is an herbal extract that helps maintain glucose in several ways. It contains insulin-like compounds that help reduce the neural response to the sweet taste stimuli. It also has been reported to help lower triglyceride and cholesterol levels by helping to support normal glucose metabolism.

Banaba Extract- Long used in the Philippines as a support for hyperglycemia, Banaba has been shown in animal studies to help support the body in normalizing blood glucose and lowering triglycerides

Cinnamon Extract- In several studies Cinnamon extract has been shown to be a potent support to the body's function of glucose metabolism. Evidence indicates it enhances insulin production in the pancreas and binding by the cells and may potentiate the uptake of creatine, as well.

Salacia oblonga- Is an Asian herb that has the unique property of discouraging the conversion of complex carbohydrates to glucose in the gut, thus reducing the overall glucose load in the blood.

Pancreas Concentrate- Normalizes the activity of the pancreas, the gland that secretes both insulin and many of the enzymes by which glucose is metabolized. If the pancreas malfunctions then so does the body's overall metabolism, especially glucose.

Liver Concentrate- The liver is a key gland in glucose metabolism. It is involved in the conversion and activation of many of the enzymes and co-enzymes that are vitally necessary to the proper absorption and utilization of glucose. Conversions of amino acids like L-Aspartic Acid to glucose take place here when the need arises. Concentrates normalize gland function.

Adrenal Concentrate- The adrenal gland is another key player in glucose metabolism. It acts as a type of coordinating body, issuing chemical commands to slow down or speed up metabolic processes and taking over functions of other malfunctioning gland systems. When the adrenal gland is not functioning properly, nothing else does either. The concentrate provides nutrients necessary to normalize adrenal function.

Gluco-Poise is packaged in 100 capsule bottles.

List of Ingredients

Supplement Facts			Liver Concentrate	75 mg	*
Serving Size: 1 Capsule			Adrenal Concentrate	75 mg	*
Servings per Container: 100 Capsules			*RDA has not Been Established		
Each Capsule Contains			%DV is based on a 2000 Calorie per day diet		
		% Daily Value			
Chromium	150 mcg	214	Also Contains:		
L-Aspartic Acid	50 mg	*	Gelatin, Rice, Cellulose, Stearic Acid, Magnesium Stearate		
Vanadyl Sulfate	5 mg	*	Recommendation: One or 2 capsules 2 or 3 times daily or as otherwise directed		
Gymne sylvestre	125 mg	*			
Bitter Melon	125 mg	*			
Banaba extract	6 mg	*			
Cinnamon extract	30 mg	*			
Salacia oblonga	75 mg	*			
Pancreas Concentrate	100 mg	*			

Gluco-Poise is designed to provide nutritional support in your chosen treatment for and especially prevention of the following:

-  **Hypoglycaemia**
-  **Type II Diabetes**
-  **Pre-Diabetic Glucose Issues**
-  **Insulin Resistance**
-  **Type I Diabetes**
-  **Cortisol Dominance**

Suggested Use Directions:

Use one or two capsules two or three times daily as a general guideline.

Some of Rocky Fork Formulas synergists for this formula are:

Allerform, B Complex 100, Chromium Complex, Co-Enzyme Q10 Sublingual Tablets or Softgels, DHEA, Fiber Complex, Hypo Gestaid, Liver Complex, Liver Complex HS, Mega Gestaid, Multigland Complex, Niacin 500, Niacinamide, Pantothenic Acid, SOD/Lipoic Acid Complex, Toler Gestaid, Univase™ or Univase Forte™, Vita Forte, Vitamin B1, Vitamin B6 100 mg, Vitamin B6 500 mg, Vitamin B12, Vitamin B15, Vitamin C, Vitamin C Timed-Release, Vitamin E, Vitasentials
