

Virex Complex

Maximum Nutritional Support Against Colds, Flu, Viruses and Infection

When designing new products or modifying existing ones, the most challenging problem is in obtaining just the right balance of nutrients in the right ratios and strengths. With Virex Complex our goal was to design, in a single capsule, all of the most useful and effective supplements that nature, the latest research and healing experience could provide. The result is a product we call Virex Complex and we believe that you will be very impressed with it.

Look closely at these ingredients and our design rationale then give Virex Complex a try.

Vitamin A- The role of Vitamin A in the body's arsenal against infection has been long known.

Vitamin C and Bioflavonoids- Vitamin C with Bioflavonoids are key ingredients in fighting colds, flu and other infections, not to mention inflammation and congestion. These two synergistic ingredients are so important in this function that their necessity has nearly become cliché. Nonetheless, they work! And they work best together.

Vitamin D₃- Vitamin D₃ has very recently been shown to pack quite an immune system boosting punch as a T-cell regulator an immune system modulator especially in cells lining the respiratory tract.

Zinc- A vital mineral in fighting colds, flu, infections and bolstering the immune system. It plays a key role in immune system activation and modulation of the function of important cells of that system like T and B lymphocytes.

Propolis- is an incredibly complex substance that consists of a mixture from certain types of tree sap with natural anti-biotic properties that is processed by honey bees and used by them to immunize their hives from infection. Several studies have confirmed its importance in enhancing white blood cell activity, inflammation of mucous membranes, congestion and "dry cough among others.

Echinacea- One of the best known extracts that aid the immune system. And for good reason. Echinacea is an important herb that supports macrophages, immune system cells that engulf and digest foreign invaders- bacteria, viruses, etc. through phagocytosis.

Grapefruit Seed Extract- Has the property of being capable of boosting the body's ability to kill a large number of bacteria, viruses, fungi and other toxic organisms. A natural antibiotic on its own

Olive Leaf Extract- Oleuropein, the active ingredient of Olive Leaf Extract is a potent natural antibiotic which inhibits the ability of bacteria to reproduce while compromising the cell's outer cell layer. Attacks bacteria, viruses, molds, fungi and yeast.

Astragalus- Chinese herb which has been shown to enhance immune function by increasing the activity of white blood cells which increases the production of antibodies, increases the production of interferon and stimulates natural killer cells

Mangosteen Extract- High-xanthone Mangosteen extract has been shown to increase T-cells and other immune system biochemicals like IL-1a and IL-1b while reducing C-reactive protein (indicates a reduction in inflammation).

Continued ingredient list

α-Lipoic Acid- An extremely potent anti-oxidant which has the unique ability to “re-charge” other important anti-oxidants like Vitamin C and many of the other nutrients contained in this product by transporting charged particles to them and away from them. α-lipoic acid acts as an amplifying agent in the immune system by aiding other nutrients in maintaining their potency and effectiveness.

Concentrated Thymus-Thymus is chock full of important immune system cells. It is a rich source of such important cells as T-cells and, especially, endonuclease enzymes which naturally destroy foreign DNA from viruses. This is an extremely important modulator of immune system response.

Virex Complex is packaged in 100 tablet bottles.

List of Ingredients

Supplement Facts			Mangosteen Extract	100 mg	*
Serving Size: 1 Capsule			Bioflavonoids	50 mg	*
Servings per Container: 100 Capsules			α-Lipoic Acid	20 mg	*
Each Capsule Contains		% Daily Value	Thymus Concentrate	50 mg	*
Vitamin A	2000 IU	2	*RDA has not been established		
Vitamin C	50 mg	83	%DV is based on a 2000 Calorie per day diet		
Vitamin D ₃ (cholecalciferol)	1000 IU	125	Also Contains:		
Zinc	10 mg	67	Gelatin, Rice Powder, Magnesium Stearate, Silicon Dioxide		
Propolis	50 mg	*	Recommendation: One or 2 capsules 3 times daily or as otherwise directed		
Echinacea	100 mg	*			
Grapefruit Seed Extract	100 mg	*			
Olive Leaf Extract	100 mg	*			
Astragalus	100 mg	*			

Virex Complex is designed to provide nutritional support in your chosen treatment for and especially prevention of the following:

-  **Colds**
-  **Bronchitis**
-  **Flu**
-  **Pneumonia**
-  **Sinus Infection**
-  **Upper Respiratory Infection**

Suggested Use Directions:

Use one or two capsules two or three times daily as a general guideline. During a chronic infection use 1 or 2 capsules every 2-4 hours

Some of Rocky Fork Formulas synergists for this formula are:

Adrenal Complex HS, Bee Pollen, Bioflavonoid Complex, Echinacea, Cats Claw, Lymph, Lysine 500, MSM, SOD/Lipoic Acid Complex, Thymus, Univase™ or Univase Forte™, Vita Forte, Vitasentials, Vitamin B15, Vitamin C, Vitamin E, Zinc Picolinate
