

Hypo Gestaid™

The Finest Digestive Aids Available

More Great Things from the Enzyme Technology Leaders

Hypo Gestaid™ is a potent combination of proteolytic, amylolytic and lipolytic enzymes with herbs, amino acids and lyophilized digestive tissue. It is specially designed using our exclusive two-phase tableting technique to meet the special digestive support needs of your patients.

Hypo Gestaid™ is designed for patients who want hydrochloric acid supplementation. Betaine HCl and Glutamic HCl are contained in the stomach phase of the tablet. The stomach phase also contains the enzymes pepsin and papain for protein digestion, Gentian root and Ginger root extracts for support and enhancement of gastric juice excretion and lyophilized stomach for support of the organ. The duodenal phase of Hypo Gestaid™ contains the enzymes pancreatin, pancrelipase, amylase and bromelain to aid the digestion of proteins, starches, simple sugars and fats as well as ox bile extract to help emulsify fats and lyophilized duodenum for organ support.

No other Formula contains the combination of enzymes, herbs gland concentrates and support designed to improve and enhance digestion and relieve a number of the problems related to poor digestion.

Compare Hypo Gestaid™ with the digestive aids you are currently using. We know that you will be impressed with the results and so will your patients. We also think that you and your patients will like the price.

It is available in 100 tablet sizes.

This formula is designed to support and promote digestive health in a variety of

Some of Rocky Fork Formulas' synergists for these formulas are:

Adrenal Complex, B Complex 100, Calcium Complex, Cal-Mag Aspartate, Liver Complex, Univase™, Univase Forte™

Dramatic results are sometimes noted almost immediately when the right digestive aid is used according to directions. Remember that about 90% of individuals with gastric complaints exhibit symptoms commensurate with hypochlorhydria and about 10% with hyperchlorhydria. These products are designed so that one tablet taken about 10-20 minutes before a meal should suffice. Rarely, two tablets may be required.
